PURSUIT–EVASION DIFFERENTIAL GAMES II

M. Pachter and **Y. Yavin**	vii	Preface
F. Imado and **S. Miwa**	1	Fighter evasive boundaries against missiles
J. Lewin and **G. J. Olsder**	15	The isotropic rocket—a surveillance evasion game
J. Shinar, M. Guelman and **A. Green**	35	An optimal guidance law for a planar pursuit–evasion game of kind
W. Grimm and **J. M. Schaeffer**	45	Optimal launch conditions on the "no-escape envelope"
Y. Yavin and **R. de Villiers**	61	The game of two cars with a containment probability as a cost function: the case of variable speed
Y. Yavin and **R. de Villiers**	69	Proportional navigation and the game of two cars: the case of a pursuer with variable speed
T. Miloh and **M. Pachter**	77	Ship collision–avoidance and pursuit–evasion differential games with speed-loss in a turn
B. Järmark	101	Two aggressive aircraft in a realistic short-range combat as a differential game study
N. Rajan	107	Two-on-one combat games
D. Ghose and **U. R. Prasad**	117	Multicriterion differential games with applications to combat problems
M. Heymann, N. Rajan and **M. Ardema**	127	Optimal strategies in event-constrained differential games
J. M. Skowronski and **R. J. Stonier**	133	Two-person qualitative differential games with two objectives
Y. Lirov, E. Y. Rodin and **B. K. Ghosh**	151	Automated learning by tactical decision systems in air combat
M. Corless and **G. Leitmann**	161	Adaptive controllers for avoidance or evasion in an uncertain environment: some examples
S. E. Hammel, P. T. Liu, E. J. Hilliard and **K. F. Gong**	171	Optimal observer motion for localization with bearing measurements
K. Tanaka	181	The closest solution to the shadow minimum of a cooperative dynamic game

H. Ehtamo, J. Ruusunen and **R. P. Hämäläinen** 189 The computation of the Nash bargaining solution

W. L. Chan and **W. T. Lau** 195 Vector saddle-point and distributed parameter differential games

E. A. Galperin and **Q. Zheng** 209 Integral global optimization method for differential games with application to pursuit–evasion games

E. Y. Rodin 245 A Pursuit-Evasion Bibliography—Version 2

SYSTEM-THEORETIC METHODS IN ECONOMIC MODELLING II

S. Mittnik vii Preface

P. Young, C. Ng and **P. Armitage** 481 A systems approach to recursive economic forecasting and seasonal adjustment

G. Kitagawa 503 Non-Gaussian seasonal adjustment

R. Kohn and **C. F. Ansley** 515 Filtering and smoothing algorithms for state space models

P. W. Otter and **R. van Dal** 529 State-space approximation of multi-input multi-output systems with stochastic exogenous inputs

P. A. Zadrozny 539 Analytic derivatives for estimation of linear dynamic models

R. Craine and **D. Bowman** 555 A state space model of the economic fundamentals

J. K. Sengupta 565 A dynamic view of the portfolio efficiency frontier

M. Cerchi 581 State space methods in asset pricing

T. Başar 591 Some thoughts on rational expectations models, and alternate formulations

F. X. Diebold 605 The solution of dynamic linear rational expectations models

H. Kuhn and **H.-W. Wohltmann** 617 Controllability of economic systems under alternative expectations hypotheses—the discrete case

N. M. Christodoulakis 629 Extensions of linearisation to large econometric models with rational expectations

V. Strejc 643 Remarks on equilibrium state achievement in state space control

P. Jain and **S. Maheshwari** 651 Optimal feedback stabilization policy with asymmetric loss functions

R. Amir 663 Globally optimal paths in the nonclassical growth model

E. Tse and **A. Khilnani** 675 An integrated system model for a fishery management process—II. A case study

iii Softstrip® data strip containing the table of contents of this issue

S. C. Scull 691 Bezier curves on groups

P. J. Y. Wong and **R. P. Agarwal** 701 Explicit error estimates for quintic and biquintic spline interpolation

B. Mukhopadhyay and **R. K. Bera** 723 Effect of distributed instantaneous and continuous heat sources in an infinite conducting magneto-thermo-visco-elastic solid with thermal relaxation

C. G. Huang 729 Several rigorous counterexamples about Saint-Venant's Principle

Z. R. Bogdanowicz and **T. G. Moore** 739 A new optimal packing algorithm for telecommunications networks planning

M. E. Cayco and **R. A. Nicolaides** 745 Analysis of nonconforming stream function and pressure finite element spaces for the Navier–Stokes equations

B. Wendroff and **A. B. White Jr** 761 A supraconvergent scheme for nonlinear hyperbolic systems

769 Software Reports

MATHEMATICAL MODELS IN MEDICINE

VOLUME 3

vii About this issue

ix Author's guidelines

O. Arino and **M. Kimmel** xi Preface

M. N. Antonios 851 Optimization problems related to water quality control in aquatic ecosystems

D. E. Axelrod and **T. Kuczek** 871 Clonal heterogeneity in populations of normal cells and tumor cells

S. N. Busenberg and **J. M. Mahaffy** 883 A compartmental reaction-diffusion cell cycle model

I. Györi 893 Oscillation and comparison results in neutral differential equations and their applications to the delay logistic equation

M. Kimmel and **O. Arino** 907 A system of differential equations modeling the G_1 phase of the cell cycle

M. C. Kohn 919 Computer modeling at the National Biomedical Simulation Resource

M. R. S. Kulenović, G. Ladas and **Y. G. Sficas** 925 Global attractivity in population dynamics

F. W. Schultz, J. J. M. van Dongen, K. Hählen and **A. Hagenbeek** 929 Time-history of the malignant population in the peripheral blood of a child with T-cell acute lymphoblastic leukemia. A pilot study

R. Shukla, J. A. Deddens and **C. R. Buncher** 937 Survival benefits of X-ray screening for lung cancer after bias adjustments

H. L. Smith 949 Competing subcommunities of mutualists

T. M. Therneau, L. A. Solberg Jr and **R. B. Jenkins** 959 Modeling megakaryocyte development as a branching process

J. R. Thompson 965 AIDS: the mismanagement of an epidemic

G. F. Webb 973 α- and β-curves, sister–sister and mother–daughter correlations in cell population dynamics

I Softstrip® data strip containing the table of contents of this issue

NUMBER 12

iii Softstrip® data strip containing the table of contents of this issue

K. G. Shih and **A. N. Palazotto** 985 Formulation of boundary integral equations for linear elastic shells

L. Harn, D. Huang and **C. S. Laih** 1001 Password authentication using public-key cryptography

N. G. Zamani 1019 A note on the quadratic element in one dimension

M. Morháč 1023 *k*-Dimensional error-free deconvolution using the Fermat number transform

J. Debnath and **R. S. Dahiya** 1033 Theorems on multidimensional Laplace transform for solution of boundary value problems

U. J. Choi and **D. Y. Kwak** 1057 Almost sure convergence of Galerkin approximations for a heat equation with a random initial condition

I *Software Survey Section*
